

Tufflite LED

5

Tufflite LED is a versatile general purpose, IP66 rated, luminaire. It is supplied with fast fit mounting clips for ease of installation, avoiding the need to drill the housing. Options include; 3 hour combined non-maintained emergency functionality, dimmable control gear and integrated lighting controls options to maximise energy savings, user comfort and control.

Linear LED light engines and efficient control gear provide class leading performance; they are protected by a GRP (glass reinforced polymer) base and polycarbonate diffuser with a high impact resistance rating of IK08.

With a comprehensive range of lumen outputs across 3 luminaire lengths, Tufflite LED delivers choice and flexibility to suit a wide range of applications such as warehousing, plant rooms, car parks, loading/storage spaces and assembly areas where high ingress protection and robust construction are required.

- Nominal 4', 5' and 6' formats, in narrow and wide housings, ideal for both new and retro fit applications
- Impact and heat resistant opal polycarbonate diffuser and GRP base housing construction, IK08 rated, and secured with anti-tamper diffuser clips
- Deep poured continuous polyurethane gasket to maintain IP66 rating
- Class leading LED luminaire performance and efficacy with lumen packages to match and exceed traditional fluorescent technology with reduced energy consumption
- Integrated lighting control options to maximise energy saving, user comfort and control
- Integral 3 hour combined non-maintained functionality option
- Fast fix stainless steel mounting clips for rapid installation. (No need to drill the housing avoiding a potential ingress path)

LED and Control Gear

- High efficacy linear LED light engines
- >80CRI, 4000K
- Energy efficient fixed output control gear as standard
- DALI dimmable control gear option

Materials

- Body – polyester GRP in RAL7035 grey with integrated gear tray supports and deep poured polyurethane gasket
- Diffuser – UV stabilised fire retardant polycarbonate
- Diffuser clips – polyamide - offering strength and integral locking screw function
- Gear tray – sheet steel, white finish
- Mounting brackets – stainless steel (grade 501)

Installation Notes

- Surface/suspension mount rear brackets supplied, removing the need to drill the housing base
- 20mm cable entry knockouts at each end, supplied complete with sealing plugs
- Terminal block with 2 x 2.5mm² cable capacity per termination
- Through wiring kits available
- Geartray hangs on the body for ease of install, locates in final position with tool free clips
- Simple to use diffuser clips, 4 of which have security screws to lock them in the closed position as an anti-tamper feature and ensures access only through tooled entry to the luminaire.
- This luminaire is IP66 rated, this rating only applies when the luminaire is installed observing the correct orientation and must not be positioned in direct sunlight.
- This luminaire has an ambient temperature of -25°C to +25°C for the non-emergency version.
- For Emergency variants, this luminaire has an ambient temperature range of -5°C to +25°C to ensure the batteries work correctly.

In exterior applications, it is recommended the luminaires are protected under a canopy or cover. The housing is not suitable for mounting with the base directly on a vertical surface in the horizontal orientation.

Options

- DALI dimming option
- Intelligent light and energy management options:
 - End mounted IP65 rated sensor with switching or dimming function, with/without photocell
- ‘Corridor Function’ control available with the ‘CO’ suffix
- Fully integral combined non-maintained emergency, 3 hour duration. Suitable for use on defined escape routes.
- We offer a range of product support contracts to aid commissioning, reduce your maintenance costs, comply with legislative test requirements and maximise the lifespan of your lighting equipment.

Specification

To specify state: General purpose IP66 rated luminaire with GRP base and reeded opal polycarbonate light controller, secured by tamper resistant hinged latches and removable geartray retained by tool free clips, as Eaton’s Tufflite LED range, part no. _____

Catalogue Numbers

5

- Emergency versions use a dedicated LED which operates only when in emergency mode
- The 'P' prefix sensor is a switching PIR only for use on fixed output control gear (unless in-conjunction with DD and CO for Corridor Function)
The 'D' prefix sensor is a PIR with photocell, the control gear option dictates the sensor type i.e:
Switching with a threshold sensor for FO gear, DALI digital dimming gear uses a regulating photocell version
- 'P' and 'D' prefix sensors are mounted in the end of the luminaire, they are IP65 rated and suitable for up to 5m mounting heights - note. The type 'P' and 'D' sensors are only suitable for temperature ranges of 0°C to 25°C
- Please refer to the dimension table and diagram for exact dimensions
- The lumen output values are not all available in all lengths, please refer to HF catalogue listing
- 'Corridor Function' is a Tridonic specific option available with their dimmable control gear, this 'CO' suffix must be added to ensure the correct driver is used. Add the 'CO' after the DD suffix.

For emergency versions please add the EL prefix, e.g. TXL5N554KZ becomes ELTXL5N554KZ

For emergency versions the circuit watts will increase by 1.5W to account for the charging circuit

For DALI dimmable options please replace the Z suffix with DD e.g. TXL5N554KZ becomes TXL5N554KDD

Refer to the catalogue number matrix for other options
